„This is a real lifesaver
for the quick and dirty jobs!“

SMART L 18V

The cordless vacuum cleaner to go!

Compact, powerful - simply SMART!

Only briefly saw off something, quickly drill a hole or in a hurry something has fallen down that needs to be vacuumed up - we know the situations. But do you have to unpack the big vacuum cleaner and look for a power outlet or sweep up the dirt with a broom? No, we have the solution - the SMART L 18V! Thanks to powerful CAS battery technology and a handy 4.2 kg empty weight, it is quickly at the place of use and reliably vacuums or vacuums up.

The new accessory system

The new QUIX system enables accessories to be changed quickly, safely and easily. The tool sleeve and handle tube are attached, snap into place and can be removed again with a simple hand movement.

Anyone can vacuum

The SMART can do more. Thanks to the practical blowing function, in addition to vacuuming dry and wet, blowing out, drying and discharging exhaust air is also conveniently possible.

Maximum mobility

The most compact suction unit from starmix can be carried over the shoulder in a relaxed manner thanks to the carrying strap supplied, while suctioning from the ladder, for example.

The perfect addition to the fleet

The CAS battery power not only gives the SMART super suction power but also makes it the perfect addition for all those who already use devices from the CAS fleet and can thus use the batteries across devices. More info at www.cordless-alliance-system.de.

SMART L 18V
Portable cordless wet/dry vacuum cleaner,
 Dust retention capacity $\geq 99\%$ acc.
 Dust class „L“

Just hang it over your shoulder,
 vacuum it up, and you're done!
 Everything should be that simple.

Cordless Alliance System: One battery for all.

The CAS is a manufacturer-independent battery system of leading power tool brands. It combines a spirit of innovation, high product performance and the common goal of making professionals independent of the power socket. Together with nine other manufacturers, starmix and haaga are among the founding members. The circle of the CAS is growing steadily, in the meantime we are at 300 machines and 32 brands with only one battery.

100% compatibility for over 300 machines in the 18 volt class!

With the CAS batteries, machines, battery packs and chargers from different manufacturers can be easily combined with each other.

100% leading battery technology!

CAS uses the world's most powerful battery system in the industry - from Metabo. With over 30 years of battery expertise, Metabo is a pioneer in battery technology and in the topic of „cordless construction site“. The focus is on 18 V, the most important application area for professional users.

100% User benefits!

CAS stands for a sophisticated battery system that you can now rely on for a wide variety of standard and special applications. Through the multiple use of existing batteries, you achieve clear cost advantages. CAS also offers maximum reliability and high investment security of a guaranteed future-proof battery system!
